Bibliography of 20th Century Art Publications  
Dokumentations-Bibliothek zur Kunst des 20. Jahrhunderts  
Hans Bolliger for Kornfeld & Klipstein, Bern

The six volumes which are brought together in this new complete edition of *Dokumentations-Bibliothek* originally served as auction catalogues for the renowned graphics and art book auction house, Kornfeld & Klipstein of Bern, Switzerland. Since their appearances between 1957 and 1977, they have become important bibliographical reference works for art historians, dealers, collectors and librarians, who cite works by their D.-B. numbers. The individual catalogues have been out of print and sought after for a number of years. These six catalogues now make their appearance in a combined cloth-bound edition. Altogether there are 2,854 catalogue entries describing more than 4,000 works, with 702 illustrations. There is a new exhaustive general index, and the compiler contributes a new foreword in both German and English. *Dokumentations-Bibliothek* describes the most important art publications— primarily of avant garde art movements—from the first three-quarters of the 20<sup>th</sup> century. The reader will find the names of writers and artists from both well-known and forgotten art, literary and intellectual movements, and their associations with specific art publications.
